Wonder Weaves Systems

3d Designer

3d Designer belongs to the Wonder Weaves software family. The company offers complete Solutions for Computer Aided Textile Design since 1987.

All products have been crafted by Mr. Ashutosh Arora, our director, who has an overwhelming experience of 35 years in the weaving industry. He is supported by a superb team of software professionals.

Your Virtual Showroom

3d Designer is a part of a vast range of software products offered by Wonder Weaves Systems. Now you can use latest technology to simulate how a design will look in its final form.

The 3d Designer is designed to quickly and easily preview fabric designs on any scanned photo or illustration. The basic idea is to open two files - a Design file containing an image of the fabric pattern and an Scene file with an image to be draped on.
